Education

Chennai Institute of Technology

B.E in Computer Science and Engineering (2nd Year) — CGPA: 8.72/10

Chennai, India

2024 – 2028

Experience

Center for Artificial Intelligence & Research (CAIR) – CIT Chennai

Nov. 2025 – Dec. 2025

Research Intern – Flask, React-Native, TensorFlow, PostgreSQL, React.js

- Built a **2D CNN + LSTM** accident-detection pipeline delivering **8–12 FPS** with **<60ms** inference on live CCTV streams, integrated with real-time alerting and location mapping.
- Developed a **React Native mobile app** with **<100ms** on-device accident detection using a quantized **1D CNN + LSTM** model.
- Implemented a **continuous learning loop** where user feedback retrains backend models, **reducing false positives** and adapting to environment-specific noise.

Projects

SeniorCare – Smart Android Launcher for Elderly Users | Android (Java/Kotlin), React Native, NLP | [Source]2025

- Built a **senior-friendly Android launcher** with simplified UI and voice automation.
- Developed a **Guardian companion app** for remote medication scheduling and monitoring.
- Implemented **on-device fall detection** using heuristic G-force thresholds.
- Optimized UI responsiveness and accessibility for low-vision and elderly users.

SPEAK AI – Real-Time Emergency Translation System | JavaScript, Whisper, Google Translate API, Socket.IO | [Source]2026

- Engineered a **real-time voice-to-voice translation system** using Whisper STT.
- Built a **bi-directional streaming pipeline** with Socket.IO for live communication.
- Integrated **automatic language detection and urgency keyword tagging**.
- Designed session logging and dashboard tracking for dispatcher analytics.

Real-Time Crowd Stampede Risk Detection | Python, CSRNet, FastAPI, WebSocket, React.js, Raspberry Pi | [Source]2026

- Developed a **real-time crowd risk analytics engine** using density and flow indicators.
- Designed a **weighted zone-wise risk scoring model (0–100)** for early alerts.
- Built a **Decision Support System** with heatmap visualization and alerts.
- Integrated Raspberry Pi live stream with WebSocket-based dashboard updates.

Technical Skills

- | | | |
|--------------|--------------|----------------|
| • Python | • React.js | • React Native |
| • C++ | • Flask | • Swift |
| • Java | • SQL | • Git/GitHub |
| • JavaScript | • Tensorflow | • Django |

Competitive Programming

Leetcode: **Knight** with contest rating of **1902** and max rating of **1904**. Solved **600+** problems. | [Profile](#)

Certifications

CCNA – Introduction to Networks

NPTEL – Introduction to Internet Of Things

AICTE – Virtual Internship in Artificial Intelligence and Machine Learning

Achievements

- Second Runner-Up in **Khacks 3.0** (50,000 cash prize), organized by Anna University, Chennai.
- **Code-a-thon 2026** Finalist (**Top 0.5%**).
- **ICAISS Conference 2026**: Presented **AI Driven Accident Detection Using CNN and LSTMs Using Mobile Phones and CCTV**.
